

## **AN IMPORTANT MESSAGE TO OUR ONLINE LISTENERS**

---

Regretfully, and quite reluctantly, we have decided to temporarily discontinue the online streaming of our broadcast through our website.

This is a necessary cost-cutting measure, due to the increasing financial burden of providing streaming, especially given the current economic climate.

Radio stations that choose to stream online incur additional costs to cover royalties and technical support, and those costs have increased substantially in recent months.

Our top priority is to maintain top-quality service to the far greater number of listeners who still tune in the traditional way: on the radio at 101.1 FM. As always, our 100,000-watt signal and our 1,000-foot-plus tower continue to provide solid coverage to all of Southwest Florida.

This was not an easy decision, and we hope to be able to resume online streaming in the near future.
